#### Teaching:

Teaching specialization: primary teaching responsibilities in the doctoral programs (PhD and DNP). While at University of Arizona, I led the development of a substantive area within the PhD in Nursing program that focused on the intersection of biobehavioral research and precision health. The courses developed focused on cellular and molecular biology/physiology (NURS 747), methodology (including systems biology; NURS 748), and the application to relevant nursing phenomena of interest (e.g. symptoms; NURS 749). Additionally, I have taught Pathophysiology (RN-BSN program, UAB), advanced pathophysiology (MSN, UAB), research methods (RN-BSN program, UAB), integrated pharmacology and pathophysiology (BSN, accelerated BSN, Emory University), and advanced pharmacology (MSN, Emory University) to support the undergraduate and graduate programs at UAB and Emory University
